French paediatrician, born 1926, Versailles.

Biography of Maroteaux, Pierre

Pierre Maroteaux qualified in medicine at the University of Paris in 1952. He has devoted himself to medical genetics and became director of research at the National Centre of Scientific Research, Hôpital des Enfants Malades, Paris. He has made important contributions to syndromic delineation and the investigation of the physiopathology of chondrodysplasias. In 1993 Maroteaux received The Mauro Baschiroto Award, funded by the Mauro Baschiroto family and presented by the European Society of Human Genetics in recognition of individual achievement in human genetics.

Bibliography

Disclaimer:

Whonamedit.com does not give medical advice.

This survey of medical eponyms and the persons behind them is meant as a general interest site only. No information found here must under any circumstances be used for medical purposes, diagnostically, therapeutically or otherwise. If you, or anybody close to you, is affected, or believe to be affected, by any condition mentioned here: see a doctor.

What is Whonamedit?

Whonamedit.com is a biographical dictionary of medical eponyms. It is our ambition to present a complete survey of all medical phenomena named for a person, with a biography of that person. Eventually, this will include more than 15.000 eponyms and more than 6.000 persons.

What is an eponym?

An eponym is a word derived from the name of a person, whether real or fictional. A medical eponym is thus any word related to medicine, whose name is derived from a person.
